GOVERNMENT RIGHTS LEGEND: Use, duplication or disclosure by the U.S. Government is subject to restrictions set forth in the applicable Okuma America Corporation license agreement and as provided in DFARS 227.7202-1(a) and 227.7202-3(a) (1995), DFARS 252.227-7013(c)(1)(ii) (Oct 1988), FAR 12.212(a) (1995), FAR 52.227-19, or FAR 52.227-14, as applicable.

"Okuma America Corporation" and Okuma America Corporation's products are trademarks of Okuma America Corporation. References to other companies and their products use trademarks owned by the respective companies and are for reference purpose only.

1.2 Purpose

The purpose of the **Release Notes** document is to communicate major new features and changes in this release of the Okuma MTConnect Adapter. It also documents known problems and workarounds.

1.3 Scope

This document describes this public release of Okuma MTConnect Adapter version 4.3.0.0

1.4 References

None

2. About This Release

In this release, the device configuration file, named Devices.xml, is automatically generated by the application to meet per machine specification that the adapter currently can support.

2.1 Prerequisite Software

This release of this application is required to include:

- THINC API release 1.22.5.0 for Lathe
- THINC API release 1.23.0.0 for MC
- THINC API release 1.22.5.0 for Grinder
- Start-up Service version 4.4.0 or latest version
- MTConnect Agent version 1.6.0.7 or latest version

2.2 License

Not applicable

OKUMA MTConnect Adapter	Version: 4.3.0.0
Release Notes	Date: 01/09/2026

2.3 Machine Model

This release supports OKUMA OSP- P300A/P300/P200/P100II or newer controls.

The following files included with the installation disk contain data items that can be supported per machine type:

- Lathe2SPDevices.xml : Lathe with 2 sides
- LatheDevices.xml: Any Lathe except for 2 sides Lathe
- MCDevices: Any Machining Center
- GrinderDevices: Any P300G Grinder
- Agent.cfg: default agent configuration file

Please contact your local distributor service department if you experience any difficulties with installing the software or using the system.

2.4 Features

The adapter supports MTConnect schema version 1.2.0 to 1.4.0 only.

This version and new version of MTConnect Adapter can support the following languages:

- English (default)

3. Changes/New

4. Known Issues

4.1.1 P100II - Two side Lathe

```
<DataItem type="EXECUTION" name="p1execution" category="EVENT" id="L2p1execution"/>
<DataItem type="EXECUTION" name="p2execution" category="EVENT" id="L2p2execution"/>
```

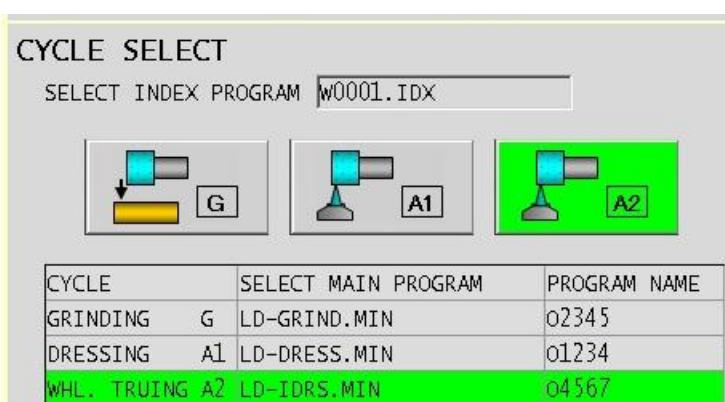

Feed hold status does not report correctly for these tags. It only reports the current active side of machine on NC HMI but not the individual side of machine.

4.1.2 P300G

```
<DataItem type="PROGRAM" name="p1program" category="EVENT" id="Gp1program"/>
<DataItem type="PART_COUNT" name="p1partcount" category="EVENT" id="Gp1partcount"/>
```

When Grinder uses Work Selection, part count and part program can only report total count of program for Grinding G Cycle as a whole.

The future release of OSP system will allow part program and part count per running part program when Work Selection is using.

OKUMA MTConnect Adapter	Version: 4.3.0.0
Release Notes	Date: 01/09/2026

4.1.3 Tool Data for P300S/P300L

For P300S(LP) :

Tool Asset, Current Tool for A/B/C turret, and ToolAssetID tags will not be available when one of the following conditions are met:

- Tool ID is ON
- TMIM is OFF

For P300L:

Tool Asset, Current Tool for A/B/C turret, and ToolAssetID tags will not be available when the specification of LTIM is OFF.

```

<!-- Tool Path related to upper A/H1 turret-->
